The End

Simon Mills makes things. He likes the flashing lights, and the opportunity to create environments of sound, as it keeps him safe from the real world. He works as a musician, occasionally produces, but mainly lives as one half of Cuckooland.

Ian Sanderson experiments. He likes surprises and adventures with natural ingredients. He likes to keep an open mind on the future of music. He is a composer, producer and musician but mainly just enjoys the process of creativity. He lives as the other half of Cuckooland.
