

Junk Percussion

To the percussionist the world is a different place. Everything can be used to make a sound; opening a door, brushing your teeth, a road drill, the kitchen and all its utensils, stones, paper, wood... the list is endless.

It is all possible 'music' to the ear.

Naturally enough though, the percussionist wants to play on something, so choice is involved - certain 'things' become assorted percussion.

To find sounds from the everyday or the throwaway - junk to some - is a real ear feast. The possibilities for sounds like these are as open as you want them to be.
