

ALSO AVAILABLE FROM ZERO-G:

TOTAL HOUSE

The reviewers agree - this **is** the ultimate in house collections! 3 CDs full of the toughest house grooves, loops, basses, synths, vocals and FX. Tons of samples all BPM matched and grouped from top names in the house music world. If house is your poison, you'll never need another sample CD package! Total coverage!

FIVE STAR ★★★★★ REVIEW:

"There really is very little about this beautifully polished and compiled release that warrants anything other than high praise. Having gathered together some of the big names in house music sound design and programming, Zero-G have come up with **as close to the definitive resource for the house producer as could be imagined**. Spread across both audio CDs (with the drum loops taking up an entire disc) each track typically contains 10 samples or loops all sensibly edited, listed with their appropriate bpm and key signature and **all perfectly suited to the samplist looking for some cutting-edge dance-floor fodder**. The meticulous attention to detail shines through not only in the sound quality which is excellent overall

(except when it's supposed not to be), but in the way that the whole library is forced into easy-to-manage tempo sets of 120, 125, 130, 135, and 140bpm. Gloriously, this covers all the samples including the wonderful collection of guitar riffs and licks, synth phrases and electric bass loops.

With a name like Zero-G you can expect quality, but the sheer ease of use and clever layout of this library will make Total House both a pleasure to use and source of inspiration for a long while to come. There are rich pad textures and a vast array of retro analogue wizzes and bleeps, and **the guitar and bass licks are highly usable and cover a wide range of house sub-genres** from '70s funk to heavily processed semi-rock sounds. For dedicated programmers with time to spare, there are a good number of multisamples of many of the instruments, and (which is more important), they are usable multisamples (not just bottom C and middle C, like some other sample CDs I could mention). There are a good number of weird vocal samples (both sung and spoken). **The drum loops are universally excellent - there seem to be so many finely tuned 'kickin' house breakbeats stuffed onto the disk that finding something that wouldn't work in your house track would, I imagine, be almost impossible.** Zero-G's Total House is a dedicated product in a specialist field that succeeds on a number of levels. **It would be worth the asking price for the drum loops alone**, but as it stands Total House gives you over 144 track-minutes of raw sample material in both audio and WAV formats. **★★★★★ 5 stars out of 5" (Sound On Sound magazine, UK).**

"If your chief goal in life is to see your fans dance the night away, 'Total House' is the soundware for you: It's packed with great materials, plenty of variety, and no filler... The programming is awesome... Contains everything you'll need to sample up a storm... Kicks serious butt... Classic & timeless in style... Great value for the money... Grab it and work up a sweat. Rated 9 out of 10" ('Keyboard' magazine, USA)

• **3CD Pack (2 Audio CDs and one .WAV CD-Rom).**

Other hot titles in the Zero-G TOTAL series include:

- **TOTAL HIP-HOP**
- **TOTAL TRANCE**
- **TOTAL DRUM & BASS**

FREQUENTLY ASKED QUESTIONS ABOUT USING ZERO-G SAMPLE LIBRARIES

- *Do I have to pay additional licensing fees if my use of these samples ends up on a hit record or other high-profile projects?* ☆ NO, your original purchase of the disc is your only license fee. We hope you do get to use our sounds on a hit!
- *Do I have to credit this disc if I use it on a recording?* ☆ NO, but it would be appreciated!!
- *Can my writing partner, colleagues or friends use these samples once I've bought the disc?* ☆ NO, each person who uses the sounds must purchase their own copy (which licenses them to use the sounds). Anyone other than the original purchaser of the disc, who uses the sounds is doing it illegally - risking legal action against both them and their clients!
- *Are these samples legally safe to use?* ☆ YES, we guarantee that all Zero-G libraries are 100% copyright clean and that you can use them safely in your music.
- *Can I offer these sounds to clients as part of my recording studio or rental company services?* ☆ NO, sorry, but each person who uses the sounds (the creative person) has to be a licensed user. This situation could cause tremendous legal problems for studio or rental clients.
- *Can I use these samples to make*

“Music Libraries”? ☆ YES, unlike some Soundware companies, this is fully allowed with Zero-G products. The samples have to be used within a musical context, however, and cannot be presented isolated or “solo’ed”.

- *Is it OK to loan the disc to a friend to check it out as long as I bought it?* ☆ NO, please don’t let your copy out of your possession. Instead, show them the sounds in person.
- *Can I post my favourite Zero-G sounds to people or sites on the Internet?* ☆ NO, but you’re welcome to comment on them! All forms of user copying and distribution are prohibited.
- *Is it OK to sell the disc used to someone else if I’m finished with the project that I needed it for?* ☆ NO, this is VERY IMPORTANT. Unlike your musical gear or even software, you can’t give away or sell this disc used to someone else - YOU DIDN’T PURCHASE THE DISC, YOU PURCHASED A LICENSE TO USE OUR SOUND RECORDINGS IN YOUR MUSIC. The disc is merely the container of the sounds we licensed to you. The license you bought is not transferable to another person.
- *Can I use the demo songs?* ☆ NO, these are the only samples on the discs that you cannot use, since they’re for demonstration purposes only.
- *Can I use these sounds in Multimedia projects?* ☆ MAYBE. If you use it in a musical context then YES, but it is best to have all

multimedia use cleared with Zero-G first. A “musical context” specifically means that you are using the sounds to create a new musical composition or arrangement. Any other application such as sound FX, icon sounds, ambiences, game noises, etc is NOT allowed without an additional license from Zero-G.

- *As a freelance sound designer, can I put custom compilation discs together which include Zero-G sounds for my composer clients?* ☆ NO, not unless they already own the original Zero-G products. Remember that each person who uses the sounds MUST have a license to use them. Otherwise, they can get in serious legal trouble.
- *Is there any limit to how often or how long I can use these samples in my music?* ☆ NO, you’re free to use them in as many musical recordings as you want. We hope that you find them inspiring and useful for many years to come!
- *Why does any of this matter?* ☆ Basically, if you respect our work by purchasing the sounds, we’ll be able to make more exciting products. You may also be asked some of these same questions by people who are contracting your services and this information can protect you and your clients from potential misuse of Zero-G sounds. You can avoid legal hassles if you use this product properly.
